THE WATCH.-I have now in my hand, a gold watch, which combines embellishments and utility in happy proportions, and is usually considered a very valuable appendage to the person of a gentleman. Its hands, face, and chain, and case are the chased and January: burnished gold. Its gold seals sparkle with the ruby, the topaz, the sapphire the emerald. I open it and find that the works without which this elegantly furnished case would be February: a mere shell, those motionless hands, and those fingers without meaning, are made of March: brass. I investigate further, and ask, what is the spring by which all these are put in motion made of? I am told it is made of April: steel. I ask what is steel? The reply is, that it is iron which has undergone a certain process. So then, I find the main-spring, without which the watch would be motionless, May: and its hands, figures, and embellishments but toys, is not of gold-that is not sufficiently good; nor of brass-that would not do-but June: of iron. Iron is, therefore, the only precious metal; and this watch an emblem of society. Its hands and figures, which tell the hour, July: resemble the master-spirits of the age, to whose movements every eye is directed. Its useless but sparkling seals, sapphires, rubies, August: topaz, and embellishments are the aristocracv. Its works of brass are the middle class, by the increasing intelligence and power of september: which the master spirits of the age are moved; and its iron main-spring shut up in a box, always at work, but never thought of, except October: 1 2 3 4 5 6 7 6 18 5 42 First Qr. 5 8 23 M when it is disordered, broke, or wants winding up, symbolically, the laboring class, which, like the main-spring we wind up by the payment of wages, and, which classes are shut up in obscurity, and though constantly at work and absolutely as necessary to the December movement of society as the iron main-spring is to the gold watch, are never thought of, except when they require their wages, or are in some want or disorder of some kind or other .- Edward Everett.

This infamous scoundrel has succeeded in sedecing one of the best of wives and broken up my family, consisting of my wife and five children, and condered myself the most miserable of mortals. I considered myself the happiest of men, being in the possession of a wife whom I deemed a paragon of domestic fidelity and female purity. But alas, the wicked spoiler came. I desire that you, Mr. Editor, will publish this brief notice of this robber of female virtue, that he may be properly estimated in those parts where he has fied to, and that he may receive some punishment for his wicked conduct, and scorn of the holy saying, "Those whom God hath joined together let not man put asande AUSTIN TURNER. 600 PLOUGHS. The subscribers are now manufacturing the most splendid lot of Ploughs, right and left handed, of the Peacock, Sloop, Diamond and Witherow Patterns, ever made in this city. Having been engaged for they consider it almost needless to say several years in this business, they consider it almost needless to say anything more than merely to let the people know that they have them on hand and for sale. They are making a large lot of the Diamond, which in loose soil or stubble take the lead of any plough now in use. The Witherow, in sod or hard ground, cannot be beat. The Peacock and Sloop are too well known to need any praise, therefore they will only add, that their Ploughs are laid with the best of German steel. The timber was selected with great care, and is well seasoned; and they warrant them in all cases to be good, and to perform well. They therefore invite Farmers to give them a trial. For sale at E.
